Medigold Health

Medigold Health is one of the UK's most respected and established providers of corporate healthcare services. We have been involved in the business of helping employers to keep their people in work, safe and well for two decades. Unlike many of our competitors, we are a clinically led organisation from the top down. Our Life President and Founder, Dr Mike Goldsmith, established the Medigold Health brand and service delivery model on the uncompromising principles of quality and integrity. We are very different to many of our competitors; We have scale, but we have a human face; We have clinical heritage, but we have pioneered the most advanced modern technology; We have our own-employed clinical resources, but still have a fully national presence; And we are growing, investing and inspiring, but we are stable and without leverage. We are redefining corporate healthcare in the UK and we are dedicated to "Keeping people in work, safe and well".
